

# How to integrate Evexia Diagnostic Laboratory Testing into your Biocanic Platform

## Activating your Evexia Diagnostic Test Ordering for your Biocanic Account

1. From your Biocanic dashboard, go to your account settings by way of the gear icon in the top menu.
2. Click “enable” on the Evexia toggle to activate your ability to order testing on your account.

## Ordering testing once you have integrated

1. From your Client’s dashboard, click Order Lab from the Lab Results section
2. Select Evexia Diagnostics from the dropdown menu.  
NOTE: You may need to authenticate your practitioner account. If so, log in and repeat the step above.
3. Type in the desired name of the lab in the Lab Name area to filter the lab list to your desired test
4. Continue to add tests to the panel as needed
5. EPIN and/or shipping and draw fees will be automatically added to your order.
6. Ensure the proper mailing address for your client
7. Click “My Client” to generate an invoice for your client to pay for the lab, or select “Myself” if you want to charge your card on file
8. Once payment is received, the order will be placed automatically with Evexia Diagnostics
9. When results are received, the results will be automatically pulled from Evexia and processed in the given client’s account.
